Areas served: I will meet you at any Kanawha County Public Library -- western end of the county preferred.

Other information: Many students over the years have stated that, after us working together, they understand math for the first time. That being said, I do not simply reteach material covered in the classroom. My objective is to teach students how to effectively learn in the classroom, and how to, when necessary, supplement that knowledge on their own. I effectively teach them how to think and how to learn, not just math, but any subject. I am pleased when my services are no longer required. That for me is a job well done.
